I'm very glad to inform you that with fully support and encouragement from my organization, I will be able to pursue the MBA in HRM degree program with EDS. I'm truly a lucky person to come across with EDS academic program which enable me to learn new skills and knowledge and built up overall competencies, at the same time I can still be able to work with my organization and be with my family--- a flexible and convinient learning approach which I can afford to particpate in terms of personnel scheduling.
